PROJECTS

1 Project :

Project Name : Repair Perfect (Home Repair Front-End Project) **05/5/2024 - 15/5/2024**

Features :

- Any user can add services and view his/her added services
- If another user books his service. The service that added it can see who has booked it.
- I put a status to manage the work of the person who booked. If it is working then it will show working and if the job is complete then it will show complete

Technology : react.js, tailwind css, mongodb, express.js

Live Side Link : [Repair Perfect Live](#)

GitHub Link : [Repair Perfect Github](#)

2. Project :
